

In our DONIC table tennis glue and cleaner product range you will find various water-based glues and cleaners for professional table tennis bats which, according to ITTF regulations, do not contain any VOC (volatile organic compounds) and can therefore be used at official competitions.

In principle, all DONIC table tennis glues can be used for all table tennis rubber sheets so that they can be easily removed from the blade. When applying pimple-out rubber sheets without sponge, we recommend using the DONIC rubber gluing foil.

Our **recommendation for DONIC glues** in detail:

Depending on type and size of the pores of your rubber sheet sponge we recommend different DONIC glues.

For rubber sheets with medium to large-pored sponge structures (e.g. for DONIC Bluefire M rubber sheet series, Acuda S or Baracuda rubber sheets) we recommend more viscous glues such as the BLUE CONTACT.

For medium and small-pored sponge structures (e.g., rubber sheet series such as DONIC Desto, Coppa X, Bluefire JP, Bluegrip or Bluestar), we recommend using rather thin liquid like VARIO CLEAN or FORMULA FIRST. When using thin liquid glues on large-pored sponges, you should apply 2 layers of glue during the first assembly in order to ensure a good gluing result.

#### DONIC rubber glue Blue Contact

The DONIC table tennis glue BLUE CONTACT is a further development that has been specially designed for large-pored sponges such as the DONIC Bluefire M

#### DONIC VARIO CLEAN

The DONIC VARIO CLEAN table tennis glue complies with the current ITTF regulations. Without any volatile organic compounds (VOC), the water-based glue guarantees the
