DONIC Rock concrete table tennis table

Product information "DONIC Rock concrete table tennis table"

The new TÜV-certified DONIC concrete table tennis table "ROCK" fully lives up to its name. Absolutely robust, durable, weatherproof, weatherproof and extremely stable are the attributes that qualify this table tennis table made of concrete stone for year-round outdoor use.

Standing consoles and panel surfaces are uniformly colored in anthracite, creating a harmonious unit and a modern look at every location.

The steel formwork-smooth surface enables an even and high ball bounce and therefore optimal playing characteristics.

The table surface is optionally available with square or rounded outer corners.

Three very solid stand consoles, which are anchored together using a robust steel rail, form the support structure for the massive 50mm thick concrete block surfaces. Due to the heavy weight of 945 kg, the concrete table should be placed on a flat and stable surface. There is no need for screwing to the substrate. However, if the ground is soft or loose, a stable foundation should be built under the support brackets in advance to prevent sinking or tilting.

The delivery of the DONIC ROCK table includes a very robust, 8mm thick aluminum net set, which is firmly and permanently anchored in the surfaces. The dimensions of the table tennis table correspond to the international standard dimensions for table tennis tables (274 x 152.5 x 76 cm).

Built to withstand the highest demands over decades, the DONIC ROCK is ideal for use in schoolyards, swimming pools, parks or public spaces. The DONIC ROCK is a guarantee for lots of fun, especially in ambitious round-robin duels or "Street Table Tennis" table tennis tournaments!

Delivery and assembly:

The stone table tennis table is delivered by courier on 2 pallets with protective packaging and a separate steel rail. The assembly time of the table is approximately 1 to 1.5 hours. Due to the weight of the parts, at least 4 people are required to assemble. When setting up the table tennis table, it is essential to ensure that there is a flat, solid floor. An asphalt surface or a paved surface is ideal for this. For full use, a free area of around 8 x 3 m should be planned.

Technical details:

Table standard: DIN EN 14468-1, Class D for leisure sports (TÜV certified)

Net standard: DIN EN 15312 (TÜV certified)

Table dimensions: 274 x 152.5 x 76 cm

Leg dimensions: 130m x 71 x 10 cm

Surface dimensions per Surface: 137 x 152.5 x 5 cm, rounded edges, white painted lines.

Net set: aluminum, width: 8mm, height: 12cm, length: 152.5cm, deburred, weatherproof, permanently installed.

Material: Concrete stonework, anthracite-colored.

Delivery: unassembled.

Weight: 945 kg

Guarantee: 10 years
